Bharath Banoth

Data Analyst

+91-6302446914 bharathbanoth471315@gmail.com linkedin.com/in/bharath-banoth-40411a266

Summary

Data Analyst with hands-on experience in data cleaning, data wrangling, exploratory data analysis, statistical analysis, and data visualization using R, Python, SQL, Excel, and Power BI. Experienced in analyzing datasets, identifying trends and patterns, and generating actionable insights, with additional experience in full-stack web development using MERN technologies.

Skills

Programming & Querying: SQL, Python, R, Java, JavaScript
Data Visualization Tools: Advanced MS Excel, Power BI
Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Statistical Analysis

Experience

Virtual R Data Analyst Intern **July 2026 – Aug 2026**
YuvaIntern – Henry Harvin Education (Remote) Tools Used: R

- Analyzed and cleaned datasets using R, performing exploratory and statistical analysis to identify trends and generate actionable insights.
- Created data visualizations and analytical summaries to identify patterns and support data-driven decision-making.
- Transformed raw datasets into analysis-ready data using structured data-wrangling and cleaning techniques.

Full Stack Web Development Intern (MERN) **Feb 2025 – Mar 2025**
EY Global Delivery Services & AICTE (Edunet Foundation) Tools Used: MongoDB, Express.js, React.js, Node.js (Remote)

- Built a full-stack Recipe Sharing Platform using MongoDB, Express.js, React.js, and Node.js.
- Integrated token-based authentication, authorization, RESTful APIs, and responsive React components for secure application workflows.
- Managed MongoDB data operations and implemented content retrieval and update workflows for the recipe-sharing platform.

Projects

Sales Dashboard — Power BI, Microsoft Excel **2025**

- Analyzed Superstore sales data to evaluate sales trends, regional and category performance, and profitability.
- Developed an interactive Power BI dashboard to present key business metrics, sales performance, and analytical insights.
- Created visual reports to identify revenue patterns and support business-focused decision-making.

Exploratory Data Analysis (EDA) — Python, Pandas, Matplotlib, Seaborn **2025**

- Cleaned and analyzed dataset records using Python to prepare data for exploratory analysis and visualization.
- Leveraged Pandas for data manipulation and Matplotlib and Seaborn for visual exploration of dataset patterns.
- Evaluated trends, relationships, and key observations through systematic exploratory data analysis.

Secure & Transparent E-Voting System — Java, Blockchain, Smart Contracts **Oct 2025 – Apr 2026**

- Engineered a secure and transparent e-voting system using blockchain technology and smart contracts.
- Integrated Java Servlets, JSP, and MySQL to support web-based voting, data management, and vote visualization.
- Incorporated cryptographic and privacy-focused techniques to strengthen secure and auditable voting workflows.

Certifications

- **Introduction to Business Intelligence** – Infosys Springboard, Apr 2026
- **Learning Microsoft Power BI** – Infosys Springboard, Apr 2026
- **Data Analytics Job Simulation** – Deloitte Australia, Forage
- **Power BI Workshop** – OfficeMaster, Sep 2025
- **Career Essentials in Generative AI** – Microsoft & LinkedIn
- **Python & JavaScript Bootcamps** – LetsUpgrade

Education

Guru Nanak Institutions Technical Campus **2022 – 2026**
B.Tech in Computer Science Engineering **CGPA: 8.35 / 10**
